Cordinit Media

Website Project Brief

Integrated Creative · Production · Digital · Media · Performance · Automation · Growth

Purpose: Define the business model, brand architecture, information architecture, UX/UI direction, content model, technical requirements, CMS structure and delivery expectations for the Confidential Media public website.

Positioning principle

Confidential Media is the creative, media and growth company within the Confidential ecosystem. It should feel like a modern, technology-enabled integrated partner — not a generic “360° digital marketing agency.”

Prepared for: Confidential leadership, design team, content/marketing team and web development team

1. Project Summary

Confidential Media is a specialist business within the broader Confidential ecosystem, focused on creative, media, production, digital experiences and measurable growth. The website must establish Confidential Media as a credible integrated partner that can support a client from an initial business or marketing challenge through strategy, creative development, production, digital execution, media activation, performance optimization and ongoing growth.

The website is not just a brochure. It is the commercial foundation for a scalable media business and should be built as a modular, CMS-driven content platform. It must support future expansion into new services, industries, case studies, specialist teams, acquired businesses, client-facing tools and technology-enabled marketing services without requiring a rebuild.

What we are building in this phase

- Responsive, high-performance, SEO-ready public website for Confidential Media.
- Capabilities-led information architecture covering Brand & Creative, Content & Production, Website & Digital Experiences, Digital Marketing, Media, Performance Marketing, Automation & AI, and Commerce & Growth.
- Dedicated work/case study experience for client proof.
- Insights hub for articles/blog content, reports, guides, white papers, videos, and perspectives.
- Industry pages that connect industry challenges to relevant capabilities and proof.
- Confidential Ecosystem page explaining the relationship between Confidential, Confidential Media and future specialist/acquired businesses.
- CMS-driven content relationships so one case study can appear on relevant capability, service and industry pages.
- Lead capture and newsletter infrastructure designed to connect to a future CRM and marketing automation stack.

2. Business & Brand Model

2.1 Confidential Architecture

Confidential Media should be a distinct brand, not merely a marketing department inside Confidential. The model should allow future acquisitions or specialist companies to retain their own brand equity where strategically appropriate, while gaining access to Confidential's technology, infrastructure, clients, talent and operating capabilities.

2.2 Positioning

Recommended positioning

Confidential Media is a creative, media and digital growth company helping brands build, launch, market and scale in a connected digital world.

Core differentiator

Creative + Technology + Performance. Make people care. Make experiences work. Make growth measurable.

2.3 What Confidential Media should NOT look like

- A generic “360° digital marketing agency”.
- A list of commodity services such as SEO | SEM | Social Media | Graphic Design.
- A website where creative, production, web, media and performance appear as unrelated departments.
- A portfolio-only agency site without a clear business-growth proposition.

3. Goals

Establish a premium, credible first impression	The site itself must demonstrate the quality, creativity and digital maturity Confidential Media sells.
Clearly communicate capabilities	Visitors should quickly understand what Confidential Media can do and where to enter based on their need.
Generate qualified leads	Primary commercial purpose is project enquiries and conversations with decision-makers.
Show proof of execution	Work, case studies, outcomes, client logos and testimonials build trust.
Differentiate from generic agencies	Position the company at the intersection of creative, technology and measurable growth.
Create SEO foundation	Capabilities, services, industries, work and insights provide long-term organic acquisition opportunities.
Enable cross-selling	A client entering through website services should discover media, production, performance, automation and growth capabilities.
Support acquisition strategy	The group architecture must be able to accommodate specialist/acquired businesses.
Create a scalable CMS	Marketing should be able to add and manage content without developer involvement.
Establish the Confidential ecosystem	Confidential Media should connect clearly to the wider Confidential technology and transformation business.

4. Target Audience

Primary

- CMOs and Marketing Directors
- Brand Directors and Heads of Brand
- Founders and CEOs
- Growth and Revenue leaders
- Digital and E-commerce leaders
- Product and Technology leaders

- Business decision-makers seeking an integrated agency partner

Secondary

- Potential acquisition targets and agency owners
- Creative agencies, production houses and performance agencies
- Technology and marketing partners
- Creators and production talent
- Potential employees
- Investors and strategic partners

4.1 Client Need → Capability Mapping

"I need a new brand."	Brand & Creative
"I need content/video."	Content & Production
"I need a new website."	Website & Digital Experiences
"I need a digital product or platform."	Website & Digital Experiences
"I need better online visibility."	Digital Marketing
"I need more leads."	Performance Marketing
"I need someone to manage media."	Media
"I need marketing automation."	Automation & AI
"I need to grow e-commerce."	Commerce & Growth
"I need an integrated campaign."	Integrated Creative + Media + Performance

5. Recommended Tech Stack (same as coordit website)

The website should retain the API-first, modular and performance-first architecture used as the basis for the existing Confidential website brief.

Frontend	Next.js / React + TypeScript	SSR/SSG where appropriate; indexable content must not depend on client-only rendering.
Styling	Tailwind CSS + design tokens	Tokens should come from approved Figma/design system.
CMS	Sanity / Strapi / Payload or approved headless CMS	All marketing content must be editable by non-developers.
API	REST or GraphQL	Dynamic content and forms should use an API layer.
Hosting	AWS / GCP / Azure	Confirm with technical lead.
CI/CD	GitHub Actions or equivalent	Merge to main deploys to staging; production deployment controlled.
Assets	CDN + responsive image delivery	Required for high-volume visual/video content.
Containers	Docker	Environment consistency.
Forms	Server-side handling + validation	Spam protection, structured storage and CRM-ready webhook/API.
Analytics	GA4 + GTM + approved advertising pixels	Consent-aware tracking and event taxonomy.
Email	Approved ESP	Newsletter signup and transactional confirmation.

6. Site Structure — Information Architecture

This section is the source of truth for navigation, routing and CMS relationships.

6.1 Navigation

Primary	Capabilities Industries Work Insights About
Primary CTA	Start a Project
Utility	Confidential Careers Contact
Footer	Full sitemap, capabilities, industries, work, insights, about, ecosystem, careers, social, legal, newsletter

6.2 Careers / Blog / Case Studies / Resources

Careers	Not a primary navigation item	Accessible in footer/utility navigation. Can be promoted later.
Blog	No separate Blog section	Blog/articles are a content type/category inside Insights.
Case Studies	Required	Dedicated Work / Case Studies experience; also reusable on capability/service/industry pages.
Resources	No separate Resources section	Guides, reports, whitepapers, downloads and similar content live inside Insights.
Insights	Primary content hub	Articles, case studies where appropriate, reports, guides, whitepapers, videos and perspectives.

Developer rule

Do not create separate hardcoded Blog or Resources systems. Use one centralized Insights content model. Case Studies must have a dedicated Work experience because client proof is a primary commercial conversion asset.

7. Overall Website Model

The site should behave as a connected content and conversion system, not as a collection of isolated pages.

CLIENT NEED
↓
CAPABILITY
↓
SERVICE
↓

8. Capability Architecture & Service Scope

01. Brand & Creative

Core services:

- Brand Strategy
- Brand Positioning
- Naming & Identity
- Brand Architecture
- Creative Strategy
- Campaign Concepts
- Creative Direction
- Art Direction
- Copywriting
- Advertising Creative
- Communication Strategy

02. Content & Production

Core services:

- Video Production
- Corporate / Brand Films
- Product Videos
- Social Video / Reels
- Photography
- UGC
- Creator Campaigns
- Influencer Content
- Animation
- Motion Graphics
- VFX
- Editing
- Color Grading
- Sound Design
- Post Production

03. Website & Digital Experiences

Core services:

- Corporate Websites
- Marketing Websites
- Campaign Websites
- Landing Pages
- E-commerce Websites
- UX/UI Design
- Design Systems
- Web Applications
- Digital Platforms
- CMS Development
- API Integrations
- Conversion-focused Experiences

04. Digital Marketing

Core services:

- Social Strategy
- Social Media Management
- Community Management
- SEO
- Technical SEO
- Content Marketing
- Blogs
- Thought Leadership
- Influencer Marketing
- Creator Marketing
- Email / Newsletter Marketing

05. Media

Core services:

- Media Strategy
- Audience Planning
- Media Planning
- Media Buying
- Paid Search
- Paid Social
- Programmatic
- Display
- YouTube / Video Media
- Retail Media
- Campaign Measurement

06. Performance Marketing

Core services:

- Lead Generation
- Customer Acquisition
- Conversion Optimization
- Retargeting
- Funnel Optimization
- Landing Page Optimization
- ROAS / ROI Optimization
- Performance Analytics
- Attribution

07. Automation & AI

Core services:

- Marketing Automation
- CRM Setup / Integration
- Lead Nurturing
- Customer Journeys
- Lifecycle Marketing
- AI Content Workflows
- AI Marketing
- AI Chatbots
- Lead Qualification
- Personalization

- Marketing Operations

08. Commerce & Growth

Core services:

- E-commerce Strategy
- E-commerce Growth
- Marketplace Strategy
- Product Page Optimization
- CRO
- Social Commerce
- Retail Media
- Customer Acquisition
- Retention
- Loyalty

9. Page-by-Page Requirements

9.1 Home Page

- Hero: positioning, supporting copy, primary CTA, secondary CTA and high-impact visual/showreel.
- Value proposition: Creative Thinking, Connected Execution, Technology Advantage, Measurable Growth.
- Capabilities overview: 8 capability cards.
- Client Need → Capability module for high-intent entry points.
- Integrated operating model: Think → Create → Build → Launch → Grow → Scale.
- Featured work / case studies.
- Industries teaser.
- Social proof: logos, testimonials, verified metrics and awards where approved.
- Confidential ecosystem module.
- Insights teaser.
- Final CTA banner.
- Footer.

Recommended homepage copy direction

Hero

Creative. Media. Technology. Growth.

Confidential Media connects creative, production, digital, media and performance to help ambitious brands build, launch and grow.

9.2 Capabilities Hub

- Overview of all eight capabilities.
- Clear service hierarchy under each capability.
- Entry points based on client intent.
- Related work and industries.
- CTA to start a project.
- CMS-driven and reusable.

9.3 Capability Overview Template

- Capability hero.
- Business problems solved.

- Service list.
- Approach / methodology.
- Deliverables.
- Featured work.
- Relevant industries.
- Related capabilities.
- Relevant insights.
- CTA.

9.4 Service Detail Template

- Service definition.
- Client problem.
- Approach.
- Deliverables.
- Technology / platforms where relevant.
- Expected outcomes — only verified/defensible claims.
- Related work.
- Related services.
- FAQ section if SEO/content strategy requires it.
- CTA.

9.5 Industries

- Industry overview grid.
- Industry detail template.
- Industry-specific challenges.
- Relevant capabilities/services.
- Relevant case studies.
- Relevant insights.
- CTA.

9.6 Work / Case Studies

- Filter by capability, service and industry.
- Case study cards should show client, challenge, capabilities and outcome where available.
- Case study detail: Client → Challenge → Objective → Strategy → Creative → Execution → Technology → Media → Results → Gallery.
- Support multiple capability/service/industry relationships.
- Related case studies.
- CTA.

9.7 Insights

- Central editorial hub.
- Filters by capability, industry, topic and content type.
- Article/resource detail template.
- Author, date, reading time, share controls.
- Related content.
- Related capabilities.
- Optional gated downloads with lead capture.
- Case studies may be indexed as a content type here for editorial discovery, while remaining accessible through /work.

9.8 About

- Who we are.
- Company story.

- Vision, mission and values.
- Leadership/team.
- How Confidential Media connects to Confidential.
- Operating philosophy.
- CTA.

9.9 Ecosystem

- Explain Confidential as the parent ecosystem.
- Explain Confidential Technology.
- Explain Confidential Media.
- Explain future specialist/acquired businesses.
- Show connected capabilities without implying that future entities already exist.
- Design so new businesses can be added later.

9.10 Contact / Start a Project

- Name, work email, company, job title, country, website, area of interest, optional budget and project description.
- Area of interest must pull from the same CMS taxonomy as Capabilities.
- Success/error states.
- Confirmation email.
- Internal notification.
- Structured database storage.
- Webhook/API for future CRM.

9.11 Careers

Careers is not a primary navigation item in V1. It should be accessible from the footer/utility navigation and use a CMS-driven structure that can be expanded later.

10. Functional Requirements

- All marketing copy, service names, capability content, industries, case studies, insights, testimonials and team data must be CMS-editable.
- Content relationships must be managed through references, not duplicated manually.
- Search across Work, Insights, Capabilities and Services.
- Newsletter signup connected to approved email service provider.
- Analytics event tracking for major CTA and conversion actions.
- Consent-aware tracking where required.
- Forms must have client- and server-side validation.
- Spam protection and rate limiting.
- Clear form success/error states.
- All pages must have editable SEO metadata.
- All images require alt text in CMS.
- Case study filtering must be dynamic.
- Capability/service taxonomy must be reusable in contact forms and filters.
- Multi-environment support: local, staging, production.
- 404 and 500 pages.
- Redirect management capability in CMS or deployment layer.

11. CMS / Content Model

Capability	Name, slug, summary, hero, body, services, industries, work, insights, SEO

Service	Name, slug, parent capability, summary, body, deliverables, industries, work, insights, SEO
Industry	Name, slug, overview, challenges, capabilities, services, work, insights, SEO
Case Study	Client, slug, challenge, objective, strategy, execution, results, metrics, gallery, capabilities, services, industries, testimonial, SEO
Insight	Title, slug, content type, author, date, reading time, category, capability, service, industry, body, assets, CTA, SEO
Team Member	Name, role, bio, photo, expertise, capability relationships, social links
Testimonial	Quote, person, role, company, case study/capability relationship
Client Logo	Client name, logo, industry, approved display flag
CTA	Title, supporting text, CTA label, destination
Site Settings	Global navigation, footer, social, contact details, analytics IDs, legal links

The content model must allow new capabilities/services/industries to be added without code changes, subject to approved taxonomy.

12. Design & UX Requirements

12.1 Brand expression

- Distinct from Confidential Technology while visibly part of the Confidential ecosystem.
- Premium, bold, creative, modern and digital-native.
- Strong editorial/art-direction approach.
- Visual storytelling should be a first-class experience.
- Design must work equally well for corporate decision-makers and creative audiences.

12.2 Design system

- Design tokens for color, typography, spacing, radius, shadows and semantic states.
- Reusable component library.
- Responsive variants for all components.
- Documented interaction states.
- Accessible contrast and focus states.
- Motion system with reduced-motion behavior.
- No hardcoded design values in reusable components where tokens should be used.

12.3 Visual content

- Use high-quality project imagery, video, campaign work and motion.
- Support hero video/showreel where performance allows.
- Provide static fallback/poster image for video.
- Optimize media for mobile.
- Do not sacrifice performance for visual effects.

12.4 Key UX principle

Findability

A visitor should understand within seconds what Confidential Media does, which capability fits their need, see proof of relevant work, and have a clear path to Start a Project.

13. SEO Requirements

- Server-rendered or statically generated indexable pages.
- Editable title and meta description for every indexable page.
- Editable OG title, description and image.
- Canonical URLs.
- XML sitemap.
- Robots.txt.
- Semantic HTML and proper heading hierarchy.
- Breadcrumbs.
- JSON-LD where applicable: Organization, Article, BreadcrumbList and other relevant schema.
- Clean URL structure.
- Internal linking between capabilities, services, industries, work and insights.
- Indexable service and industry pages.
- SEO-friendly pagination/filter strategy.
- Redirect support for changed slugs.

SEO content strategy note

The site should target high-intent service searches such as website development, video production, performance marketing, media buying, marketing automation and related industry/service combinations. Final keyword strategy should be developed by marketing/SEO before content production.

14. Analytics & Conversion Tracking

start_project_click	Primary CTA engagement
contact_form_start	Form intent
contact_form_submit	Lead conversion
newsletter_signup	Audience acquisition
case_study_view	Proof engagement
service_view	Service intent
capability_view	Capability intent
insight_view	Content engagement
resource_download	Lead/content conversion
video_start / video_complete	Media engagement
outbound_click	External partner/platform activity

All analytics implementation must follow the approved consent and privacy requirements.

15. Non-Functional Requirements

Performance

- Core Web Vitals targets: LCP < 2.5s, CLS < 0.1, INP < 200ms.
- Lighthouse target: 90+ on mobile and desktop.
- CDN delivery for images and static assets.
- Responsive image formats and srcset.
- Lazy loading below the fold.
- Video compression, poster images and adaptive delivery where appropriate.

Accessibility

- WCAG 2.1 AA minimum.

- Keyboard navigable.
- ARIA labels where required.
- Accessible forms and errors.
- Sufficient contrast.
- Alt text required for CMS imagery.
- Reduced-motion support.

Responsive

- Mobile
- Tablet
- Desktop
- Test on real devices.

Security

- HTTPS enforced.
- Input sanitization and validation.
- Rate limiting.
- CSP headers.
- No secrets/API keys in client-side code.
- Environment variables + secrets manager.
- CMS/admin protected with strong authentication; MFA recommended.

16. Recommended Repository Structure

```

/Confidential-media
├── /app
│   ├── /components
│   ├── /features
│   ├── /lib
│   ├── /styles
│   ├── /types
│   └── /api
├── /public
│   ├── /images
│   ├── /icons
│   └── /videos
├── /cms
│   ├── /schemas
│   ├── /capabilities
│   ├── /services
│   ├── /industries
│   ├── /case-studies
│   └── /insights
├── /tests
├── /docs
├── .env.example
├── docker-compose.yml
└── README.md

```

17. Forward Compatibility

- API-first architecture for dynamic content and form data.
- Lead schema designed for future CRM.
- Authentication architecture should be able to support a future client portal.

- The design system should be reusable for future Confidential Media client-facing applications.
- CMS content model should support additional capability/service depth without code changes.
- Case study and capability taxonomy should be reusable by future dashboards and AI systems.
- Analytics events should use stable naming so future reporting platforms can consume them.
- Acquisition/specialist-business architecture should allow new businesses to be added to the ecosystem without restructuring the main site.

Future platform direction

Potential future journey: Brief → Strategy → Creative → Approval → Production → Media → Performance → Reporting → Optimization. The v1 website does not implement this platform; it should simply avoid blocking it.

18. Competitor / Market Reference Framework

These companies are reference points for business architecture, capability organization and market positioning. They are not templates to copy visually or verbally. Confidential Media should develop its own identity and proposition.

Monk	Connection of media, creativity, production, commerce and technology; integrated content production.	Make connected execution and scalable content a core proposition.
Instrument	Platform/"Connecting Company" model; agency brands can coexist with shared operational backbone.	Build an ecosystem model rather than a single-service agency structure.

19. Deliverables & Milestones

1. Discovery & Architecture	Final sitemap, taxonomy, content model, user journeys, requirements confirmation	Strategy + Marketing + Design + Tech
2. Design System	Brand application, typography, colors, components, responsive system, motion principles	Design
3. Technical Setup	Repository, CI/CD, staging, CMS, analytics foundation, environments	Development
4. Core Pages	Home, About, Contact, Ecosystem	Design + Development
5. Capabilities	Capabilities hub, capability templates, service detail templates	Design + Development + Content
6. Industries	Industry hub + detail template	Design + Development + Content
7. Work	Work hub, filters, case study template	Design + Development + Content
8. Insights	Insights hub, filters, article/resource template	Design + Development + Content

9. Integrations	Forms, newsletter, analytics, pixels, CRM-ready webhook	Development + Marketing Ops
10. QA & Launch	Accessibility, performance, SEO, security, device/browser testing	QA + Development + Design
11. Launch	Production deployment, DNS, monitoring, analytics verification, sitemap submission	Development + Marketing

20. Definition of Done

- ☐ Functionally matches this brief.
- ☐ Responsive on mobile, tablet and desktop.
- ☐ Passes WCAG 2.1 AA requirements.
- ☐ Lighthouse target ≥ 90 .
- ☐ All marketing content is CMS-editable.
- ☐ Capability/service/industry/work/insight relationships work correctly.
- ☐ SEO metadata exists for every indexable page.
- ☐ Structured data implemented where applicable.
- ☐ Forms validated client + server side.
- ☐ Forms protected against spam and abuse.
- ☐ Analytics events implemented and verified.
- ☐ Images and video optimized.
- ☐ No critical console errors.
- ☐ Cross-browser tested.
- ☐ Real-device tested.
- ☐ Code reviewed and merged through PR.
- ☐ CMS schemas documented.
- ☐ Component library documented.
- ☐ API/integration documentation complete.
- ☐ Deployment and environment documentation complete.
- ☐ No secrets committed to repository.
- ☐ Redirects and 404/500 behavior verified.
- ☐ Content ownership and approval responsibilities confirmed.

21. Final Website Model — One-Page Reference

Confidential MEDIA
Creative • Media • Production • Digital Growth

PRIMARY NAV

04 Digital Marketing
05 Media
06 Performance Marketing
07 Automation & AI
08 Commerce & Growth

CONTENT SYSTEM

Capabilities ↔ Services ↔ Industries ↔ Work ↔ Insights

CLIENT JOURNEY

Need → Capability → Service → Proof → Industry Context → Contact

V1 CONTENT RULES

Blog → Insights

Resources → Insights

Case Studies → Work (+ discoverable in Insights)

Careers → Footer / Utility

PRIMARY CONVERSION

Start a Project → Structured Lead → Future CRM / Automation

Website Flow & Customer Journey Implementation Flow

1. Global Conversion Principle

Each commercial page should use one clear, outcome-led primary CTA: Book a Call. Secondary CTAs support discovery, such as Explore related solutions or View insights. The global Book a Call CTA should open </contact?intent=book-a-call>.

2. End-to-End Website Journey

Visitor enters → discovers a solution, industry, accelerator or insight → selects a relevant CTA → explores further or converts → confirmation → Confidential receives the lead and attribution context.

Recommended Book a Call journey: Book a Call → </contact?intent=book-a-call> → qualification form → embedded scheduling → select available date/time → meeting created → confirmation + calendar invitation → reminder → meeting.

3. Book a Call — Final Field Set

CTA → /contact?intent=book-a-call → Qualification → Schedule → Select time → Confirm → Calendar invite → Reminder → Meeting

BOOK A CALL MICRO-FLOW

- First Name*
- Last Name*
- Work Email*
- Company*
- Job Title
- Area of Interest*
- What would you like help with?*
- Consent checkbox*

Area of Interest: Cybersecurity; Salesforce; AI & Automation; Cloud & Infrastructure; Application Engineering; Data & Integration; Managed Services; Something else.

4. Hidden Lead & Attribution Data

- Source / landing page
- CTA location
- Solution / service
- Industry
- Accelerator
- Insight/content
- UTM Source / Medium / Campaign / Content
- Referrer
- Submission date/time
- Booking date/time

Example: Cybersecurity → Vulnerability Management → Book a Call should retain both the practice and specific service context.

5. Confirmation States

General enquiry: "Thank you — we have received your enquiry. We will be in touch soon." Then Explore Solutions and View Insights.

Booked call: "You're booked." Show date/time and meeting details, confirm the calendar invitation was sent, and provide reschedule/cancel options where supported.

6. Tracking Events

- book_call_click
- contact_form_view
- contact_form_start
- contact_form_submit
- contact_form_success
- contact_form_error
- solution_explore
- industry_explore
- accelerator_explore
- insight_read
- newsletter_view
- newsletter_start
- newsletter_submit
- Newsletter_success

11. General Contact / Enquiry Journey

Field	Required	Purpose
First name	Yes	Contact identity
Last name	Yes	Contact identity
Work email	Yes	Response / lead identity
Company	Yes	Organisation context
Job title	Recommended	Role/context
Area of interest	Yes	Solution qualification
What would you like help with?	Yes	Requirement
Consent	Yes	Permission to respond

Submit → client/server validation → spam protection → confirmation email → internal notification → database storage → confirmation page with Explore Solutions and View Insights.

11. Insights Journey

Insights Hub → search/filter → featured/latest content → Read Article / Case Study / Report → /insights/[slug] → related content / Solutions → Book a Call.

Newsletter: Insights → Work email + consent → Subscribe → success state. Newsletter is separate from the Book a Call journey.

- Book a Call is the consistent primary commercial CTA.
- Book a Call opens the booking-intent contact route and retains source context.
- If live scheduling is embedded, remove the manual Preferred time field.
- Use Confidential-approved calendar availability and meeting configuration.
- Successful bookings create the meeting and send the visitor a calendar invitation/confirmation.
- General enquiry submissions validate, use spam protection, notify the internal team, send visitor confirmation and store data for future CRM use.
- Solutions taxonomy is centrally managed and reused by the contact form and relevant filters/related-content modules.
- Track conversion source and relevant solution/industry/accelerator/insight context.
- Do not publish unconfirmed response times, contact details or team-routing information.
- Calendar, email, CRM and analytics accounts/configuration should remain under Confidential control.

Preferences for integration : <https://calendly.com/> or <https://cal.com/ai> Or you can come up with the affordable platform that gives us more flexibility..

Thank you.

Proposed Navigation Map :

 Cordinit_Media_Advanced_Navigation_and_User_Flows.xlsx

DESIGN NOTE — HIGH CREATIVE EXPECTATION

This is a **creative-first, experience-led website**. The UI, graphics, typography, motion, interaction, transitions, imagery, video and navigation should feel **modern, premium, experimental and distinctive**. Advanced web interactions and emerging technologies should be explored where they strengthen the experience. The website itself must demonstrate **Creative + Media + Technology + AI** capabilities and should feel like a **showcase of Cordinit Media's own work**, not a conventional agency/template website. Creativity must be balanced with usability, performance, accessibility and conversion.
